

WERRIBEE

Chronograph Day No. 2

Team members setting up Chronograph testing at the 600 yards range.

A number of the members of the state team travelled to Werribee Rifle Range early March to attend the second of the team's chronograph days. The first having taken place at Grantville Rifle Range in June 2019.

The data gathered gives an idea of how consistent the rounds are as far as velocity, particularly for longer range rifle shooting. Analysis of this information in conjunction with data from other sources can help to improve accuracy.

Many thanks to the Werribee Rifle Club for allowing us to use their range.
